# PONG KRAI ORGANIC COFFEE PLANTATION TRAIL

Follow the story of our Pong Krai Organic Forest Coffee, served at Raya Heritage, and learn about its production by visiting the coffee's plantation itself as part of the Baan Pong Krai Community Tourism program. Get to know the local villagers and participate in an environmental conservation activity provided by the village. Join our wild orchid breeding activities and enjoy planting them in the forest along the natural path to propagate the Fah Mui orchid, Thailand's very rare blue-purple colored wild orchids, as a legacy for their descendants to appreciate.

"Pong Krai Coffee" Arabica coffee bean, is a Catimor breeding line from Columbia. It has been well-grown at an altitude of 1,000 to 1,100 meters above sea level under the shade of forest trees in Baan Pong Krai, Maerim, Chiang Mai since 2014 until now. The beans were first harvested by hand in 2016 using the Wet Process to extract cherry beans from the pulps, dry and prepare for artisan roasting. It usually takes 6 months to ferment the shell coffee before the beans are roasted. The annual yield of coffee cherries ranges from 12,000 to 16,000 kilograms per year.
